github.com/Sadusindhu — linkedin.com/in/venkata-naga-sai-durga-sindhu-sadu-4a7a12324

Objectives

Final-year B.Tech Computer Science student with hands-on experience in Python, Java, JavaScript, SQL, HTML, CSS, Flask, and full-stack application development. Skilled in developing responsive web applications, API-integrated applications, database-driven solutions, and AI-based systems. Strong foundation in Object-Oriented Programming, Data Structures and Algorithms, problem-solving, application development, testing, debugging, and machine learning. Experienced in building projects involving REST API integration, web application development, predictive modeling, and natural language processing.

EDUCATION

Vel Tech Rangarajan Dr. Sagunthala RD Institute of Science and Technology	Chennai, TN Bachelor of Technology in Computer Science and Engineering	GPA: 8.3/10.0 Aug 2022 – Mar 2026
Narayana Junior College	Ongole, AP Intermediate in MPC	GPA: 7.5/10.0 Jun 2020 – Mar 2022
B R High school	Ongole, AP 10th Grade	GPA: 10/10.0 Jun 2019 – Mar 2020

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, SQL
- **Web Technologies:** HTML5, CSS3, JavaScript, Responsive Web Design
- **Backend Development:** Flask, API Integration, Web Application Development
- **Database:** MySQL, SQL, Database Connectivity, Data Management
- **Programming Concepts:** Object-Oriented Programming, Data Structures and Algorithms, Problem Solving
- **Machine Learning:** Linear Regression, Random Forest, CNN, RNN, Transformers, Predictive Modeling
- **Tools Platforms:** Google Colab, AWS
- **Development Practices:** Testing, Debugging, Modular Development, API Integration
- **Soft Skills:** Communication, Time Management, Self-Learning, Problem Solving

INTERNSHIP / TRAINING

Web Development Training

- Completed intensive training in HTML, CSS, and JavaScript with hands-on development of responsive and interactive web applications.
- Developed a Personal Portfolio Website, Dynamic To-Do List with Local Storage, Product Listing Page with Filtering and Sorting, and API-integrated web applications.
- Worked with frontend application development, API integration, client-side data handling, form-based interactions, and responsive user interfaces.

PROJECTS

FLASK-DRIVEN INTERACTIVE TOOL FOR HOUSE PRICE PREDICTION *Python — Flask — Machine Learning — Jan 2025*

- Developed a web-based application using Flask to provide property price predictions based on location, area, room count, and other property parameters.
- Integrated machine learning models with a web application to process user inputs and generate real-time property valuations.

A DYNAMIC DEEP ENSEMBLE APPROACH FOR SPAM DETECTION *Python — CNN — RNN — Transformers — Jun 2024*

- Developed a deep learning-based spam detection system using an ensemble architecture combining CNNs, RNNs, and Transformer-based models for textual feature extraction.
- Implemented a hybrid neural architecture to capture local text patterns, sequential information, and complex semantic context for spam classification.

EXTRACURRICULAR ACTIVITIES

- Participated in UNNAT BHARAT ABHIYAN (U.B.A), a national program aimed at empowering rural India by identifying development challenges and promoting sustainable growth through institutional collaboration.
- Participated in the International Yoga Day event organized at the college.
- Participated in technical and coding activities that strengthened problem-solving, teamwork, communication, and self-learning skills.

CERTIFICATIONS

- **IBM z/OS Mainframe Practitioner Certification** – IBM
- **AWS Academy Cloud Foundations** – Amazon Web Services Academy
